

## FACES 4.0 Composite Technology

*Used by Police because IT WORKS*

Thousands of police agencies worldwide -- including the CIA, FBI and the US Military - know that FACES breakthrough technology is an essential tool to identify and apprehend criminal suspects. FACES 4.0 makes it easy for any police officer to create accurate composites with a click of a mouse. No forensic artist skills or experience are required. With FACES, composites can be created quickly and inexpensively to help solve crimes when a professional sketch artist isn't available.

FACES 4.0 is the latest and most advanced version of our award-winning technology. New 4.0 features:

- New easy to use interface
  - Improved zoom & position tools
  - Slide show capability
  - Integration with Video Analyst System (video surveillance stabilization and enhancement)
  - "Not a Real Photograph" indicator
- Expanded multi-racial database of 4,400 facial features
  - Facial markings such as scars, moles, piercings and tattoos
  - Three different hair tones, and side-to-side hair flip
  - Improved age progression
  - Detachable hats and headwear
- Quickly communicate composite drawings
  - Click-& send images by email
  - Export images as JPEG files to police bulletins and websites
  - Integration with TRAK emergency alert system
- Use on any standard PC/MAC computer
- Free phone/web-based technical assistance for 90 days

**"FACES helps capture criminals. It's as simple as that."**

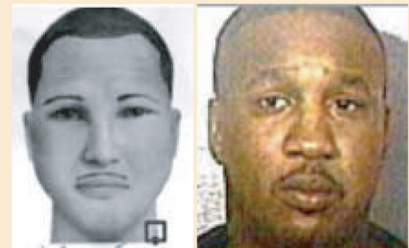

John Walsh,  
Host of America's Most Wanted

**"We chose FACES because it generates a unique ID code for every composite: at less than 1KB in size the code is ideal for wireless transmission between our police cars and station."**

Mississippi State Police Agency on purchase of FACES software for patrol cars.

**"The composite sketch developed with the FACES software was a significant aid in identifying the suspect."**

St. Martin Parish Sheriffs Office

FACES helps in arrest of South Louisiana multiple murderer.
