

## Inspice Trace for laptops

### Overview

Inspice Trace is a location tracking program that emails you the precise location of your stolen laptop. In addition, it lets you irrecoverably destroy your sensitive data in the laptop to protect the data from any unauthorized access. It is the only laptop tracking software that offers 100 percent privacy and data protection with a US Department of Defense data clearing and sanitizing standard.

### Feature Highlights

- Protect laptops against theft.
- Accurate and worldwide tracing result.
- 100% privacy safe- you are not being monitored.
- Destroy sensitive data in stolen or lost computer.<sup>1</sup>
- US Department of Defense clearing and sanitizing standard DOD 5220.22-M compliant.<sup>1</sup>
- Tamper-proof.
- Innovative fault-tolerant and privacy-safe tracking technology- patent pending.
- Delivery to your door on request after stolen/lost laptop recovery. (optional service)
- Theft prevention and recovery service SmartProtec auto activated.

<sup>1</sup> Enterprise edition only.

<sup>2</sup> delivery is available on your request.

### Benefits

- Protect data and assets
- Help comply regulations
- Reduce corporate liability
- Reduce internal theft
- High return on investment (4,000% +)

### Accurate Tracking

The tracking result of Inspice Trace is guaranteed to be 100 percent accurate.

Inspice Trace, a location tracking program residing in your computer or device, determines the location of your computer (or device) and sends you location information via email. This allows quick recovery of your stolen or lost computer (or device).

Inspice Trace determines location of the computer or device by analyzing network configuration information of the computer or for the device. The network configuration information includes Internet IP addresses and hostnames.

### Data Protection

Inspice Trace deploys US Department of Defense clearing and sanitizing standard DOD 5220.22-M compliant to protect sensitive data.

It lets you remotely destroy sensitive data in your stolen/lost computer (or device) to protect the data. The data destruction method complies a US Department of Defense clearing and sanitizing standard to ensure that data is thoroughly and unrecoverably destroyed. This data protection feature is available to only certain types of Inspice Trace programs.

When you authorize data destruction by pressing a delete button on inspice web site, the Inspice server sends a delete command via the Internet to Inspice Trace program residing in your stolen or lost computer. The program will securely and unrecoverably destroy the data in the stolen or lost computer. It will protect your sensitive data from any potential unauthorized access.

### 100% Privacy Safe

Inspice Trace program determines the location of the computer (or device) without using monitoring servers. For your privacy, Inspice servers do not monitor or trace your computer (or device) and you.

You're not monitored or traced by Inspice or Inspice servers. Inspice Trace program does not send any signals to Inspice servers for it's location determination. Inspice Trace program determines the location of the computer (or device) without using Inspice servers and without using any other monitor servers or tracing host systems.

Owners are not required to provide any personally identifying information to use this program.

### Regulation Compliance

Inspice Trace helps you comply regulations. Some of the US regulations Inspice Trace helps to comply are Sarbanes-Oxley,

HIPPA, California Senate Bill 1386, New York State Senate Bills S.5178 & S.3492A and Gramm-Leach-Bliley (GLB).

## Theft Prevention and Recovery
