

ShowStation IP

Share Documents Around the Room or Around the World

Business today is extremely fast paced and competitive. Timely decisions are the lifeblood of any business, they must be made quickly and effectively, often involving executives or project team members across the country or around the world. Yet travel budgets are tight and business trips exact a huge toll in lost time and productivity.

A typical teleconference falls short when you need to share documents for effective work group collaboration. The answer is Polycom®'s ShowStation® IP — the integrated conference projector that makes meetings more productive and efficient by allowing you to interactively share almost any kind of information.

The System that Lets You Think on Your Feet

With ShowStation IP meetings can be much more productive. There is no need to print overhead transparencies, lug your laptop into a conference room, or send faxes or email out before a meeting. ShowStation IP allows you to project any type of document or Microsoft Office file in big screen format and share it with any location instantly.

With Polycom's Web Browser meeting technology, joining a meeting while you're on the road or in a remote office is as easy as browsing the World Wide Web. Multiple participants can simultaneously join meetings to view presentation slides and give presentations using their current Internet Explorer or Netscape Web Browser. There is no easier way to hold remote meetings. Simply let ShowStation IP do the work, and all of you locations will instantly see all of your important information in high-resolution color.

ShowStation IP is ideal for both ad hoc presentations and collaborative working sessions. Meeting participants at any site can use an electronic pen to write, draw, highlight, or erase on the unit's LCD panel — just as

you would on an overhead transparency — with all notes and comments immediately visible to everyone. You can even print copies of marked-up pages for future reference.

ShowStation IP can enhance your team's ability to collaborate whether you're all in the same room or at geographically diverse sites. With its optional XGA and video compatible inputs, you can use the system as you would an LCD projector for local meetings. You can now instantly project on-screen and share anything on you PC or laptop screen with remote locations. This provides the first true cross platform solution for displaying documents with any meeting participant, anywhere in the world in real-time. For more powerful collaboration, ShowStation IP comes equipped with the industry's first integrated Microsoft® Office '97 file import capability that allows you to share documents. And, ShowStation IP also incorporates a state of the art color XGA document camera that provides stunning color scanning of hard copy documents and small objects with lightning speed. Any way you choose to make your point, you can do it with ShowStation IP.

Simple, Intuitive Operation

ShowStation IP is as easy to use as an overhead projector. So virtually anyone can give a presentation or collaborate on a document with little or no training. And it's ready to go right out of the box.

Connecting with other sites is as simple as making a telephone call. Also, in addition to communicating over ordinary phone lines, ShowStation IP is the first integrated meeting solution that allows you to connect conferences via the Internet or corporate intranets. Remote sites can be other ShowStation IPs or PCs.

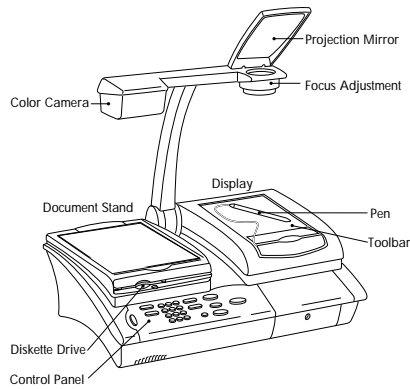

ShowStation IP gets everyone, everywhere, into the meeting and keeps them on the same page for better, faster decision-making.

ShowStation IP

ShowStation IP Integrated Conference Projector

Features and Benefits

Participate in Meetings from ANY location...

- ▼ Join meetings from any location using your existing Web Browser (Internet Explorer or Netscape).
- ▼ Integrated Web Browser meeting solution for giving presentations from you PC from any location.
- ▼ First projector to communicate over standard analog telephone lines, Intranets, the internet, and the World Wide Web.
- ▼ Low-Bandwidth Internet/Intranet Multipoint solution for bringing together all of your meeting sites.
- ▼ Microsoft NetMeeting compatible.

Display ANY document to all meeting participants...

- ▼ Displays Microsoft PowerPoint, Word, and Excel files (Office '97 or lower).
- ▼ The only integrated high resolution (XGA) color camera that can capture a complete 8.5 × 11 business document as well as small 3D objects.
- ▼ Displays all types of documents and shares them with all remote locations: paper, overhead transparencies, small objects, MS Office files.
- ▼ LCD projection for big screen display of PC video, VCR's DVD's and other A/V devices (optional).
- ▼ Large-format projection and bright display deliver a high-resolution lights-on solution for viewing even small font types from anywhere in the room.
- ▼ Familiar overhead projector design and operation make ShowStation IP simple to use.
- ▼ Full selection of tools (highlighting, making notes, pointing, drawing, or erasing) for collaborative sessions at all sites.
- ▼ Can be used only as a local projector or for collaborating with any number of remote locations.

Technical Specifications

Brightness	450 ANSI lumens
Resolution	768 (w) × 1024 (h) pixels (XGA)
Focus range	3.3 ft to 11.1 ft (1 m to 3 m)
Interfaces	Telephone: RJ11 (optional) LAN: RJ45 (10BaseT) Computer: 9-pin D-sub (RS-232) Printer: 25-pin D-sub (parallel)
Video inputs (optional)	VGA, SVGA, XGA S-Video Composite (NTSC, PAL, SECAM)
Lamp type	400 W metal halide
Lamp life	1,000 hours (typical)
Dimensions	23.1 in × 17.6 in × 28 in (58.7 cm × 44.7 cm × 71.1 cm)
Weight	42 lb (19 kg)
Operating temperature	41° F (5° C) to 95° F (35° C)
Storage temperature	-4° F (-20° C) to 122° F (50° C)
Power consumption	700 W (maximum)
Power supply	85-264 VAC, 47-80 Hz
Regulatory approvals	FCC Part 15 Class A, UL, C-UL, CE Mark, VCCI, FCC Part 68
Warranty	One-year limited warranty on parts and labor; see warranty for full details
