

WebStation

Use the World Wide Web as a Virtual Conference Room for Sharing Presentations and Documents.

The Internet has proven to be a powerful tool for improving productivity and communication. Now, you can use the World Wide Web to create a virtual conference room, for faster and better decision-making.

Polycom's® WebStation™ is a Web-based presentation and meeting system that lets you hold group conferences on a moment's notice anywhere the Internet reaches. You can give presentations and share documents with remote participants as if they were in the conference room with you.

Familiar Web Interface

The familiar Web browser interface means that anyone can join a meeting, with no special training. WebStation accommodates up to 25 remote locations in a single document conference. Remote meeting attendees can view and present slides and documents in a conference session from their PC.

To start your meeting, simply connect the WebStation to any LCD projector. Because the system comes with the complete Microsoft® Office suite, you can download PowerPoint®, Word or Excel files directly from your desktop. Or you can bring them with you on a floppy diskette. There's no need for a separate laptop.

You can also display paper documents on-screen in high resolution color and simultaneously share them with remote participants, using WebStation's optional color scanner.

Complete Conferencing Solution

WebStation complements your current audioconferencing system, providing an affordable real-time document conferencing solution that eliminates the need to fax or e-mail documents before the meeting.

For enhanced meeting solutions, WebStation seamlessly integrates with Polycom's industry leading SoundStation® audioconferencing and ViewStation™ videoconferencing systems.

WEB-BASED PRESENTATION AND MEETING SYSTEM

Features and Benefits

- ▼ First document conferencing solution designed to work in the conference room with any LCD projector and use the World Wide Web to create a virtual meeting environment.
- ▼ Accommodates up to 25 remote participants, using a Web browser, in a single meeting.
- ▼ Includes the full Microsoft® Office suite, to conveniently support PowerPoint®, Word and Excel files without the need to print hard copy documents or to connect to a laptop computer.
- ▼ Document zoom capability allows participants to see fine detail and small fonts.
- ▼ Meeting archive feature saves a record of the entire meeting to track decisions and follow up on action items.
- ▼ Password protection provides privacy for meetings held over the World Wide Web.
- ▼ Integrated floppy diskette disk drive enables you to load Microsoft Office files from diskettes.
- ▼ Easy-to-use remote control enables presenters to move about the room with ease.
- ▼ Optional high-resolution color scanner provides the ability to project and share paper documents during your meetings.
