

Encore

Now You Can Change Your Caller's Tone of Voice

Plantronics headsets have become the world's talking point, with more than six million in use today.

Featuring a unique Sound Enhancement System™ (SES), Encore® headset users have the option, at the flick of a switch on the headset, to listen to the caller's normal telephone voice or to adjust the sound for a fuller, richer tone. Encore headsets provide a perfect acoustical fit, adjustable headband, and soft ear cushions for optimum comfort, stability, and fit.

Encore Monaural headsets, with sound in one ear, are lightweight and are ideal for users who may need to confer with colleagues when making or taking a call. For environments where users really need to concentrate on the call, there is a single-cable Binaural version, which gives greater clarity by providing sound in both ears.

The Encore Monaural and Binaural Noise-Cancelling models have all the features of the standard Encore headsets, but use a unidirectional, noise-cancelling microphone mounted on a flexible stem in place of the voice tube. By eliminating up to 75% of all background noise, the noise-cancelling headsets make speech much clearer in noisy environments.

Talk to Plantronics

Encore headsets are just one of a complete range of headsets from Plantronics. If you would like to know more, contact your distributor/dealer. They'll tell you why the world is talking about Plantronics headsets...and into them.

Encore®

- **Comfortable and Convenient.**

We conducted the largest human-factors study of the ear ever undertaken to design this super-stable, super-light headset. With multiple adjustments possible, the Encore headset will fit just about anyone comfortably.

- **Freedom of Movement.**

Multitask while talking on the phone. If it becomes necessary for wearers to leave their desks, simply use the Quick Disconnect™ feature without removing the headset, and the other party stays on the line.

- **Sound Quality from the Leaders.**

Plantronics uses a superior voice tube design, with patented SoundGuard®Plus™ and Call Clarity™ technology, which contributes to the Encore headset's excellent sound quality.
